

# DEWALT®

# VERSATILE COVERAGE FOR EVERY WORK ZONE

## DXSL SERIES LED STRING LIGHTS

- Operates on standard 120V AC with low-amperage LED technology, allowing more lights per circuit to prevent breaker trips on busy jobsites.
- SJTW cabling designed to withstand heavy-duty use and extreme environments.
- Linkable design allows for massive lighting footprints.
- Integrated LED lamps to eliminate bulb theft and maintenance downtime.

# LED STRING LIGHTS

The DXSL Series LED String Lights are engineered for the modern contractor. Utilizing high-efficiency LED technology, these stringers provide uniform, high-contrast light that reveals fine details and potential hazards without the heat or energy waste of traditional halogen systems.

Built to survive the daily rigors of the professional jobsite, the DXSL Series eliminates the constant maintenance of bulb replacements and the fragility of standard consumer-grade lighting. Each unit is designed for rapid deployment and maximum uptime, allowing you to transition from a dark shell to a fully illuminated, productive workspace in minutes.
